This article applies to the Ford F-150 (2004-2014) and the F-250, F-350 Super Duty (2005-2014). The serpentine belt is vital to keep your Ford F-150 or Super Duty running. A worn belt will look both dry and cracked, and it will give you a nasty squeal when starting your truck. Over time, the squeal will worsen and be constant.

Ford F-150/F-250: How to Replace Serpentine Belt | Ford-trucks

Ford Ranger. Ranger is Ford's attempt in a crowded compact pickup truck, whose production spans for several decades and four generations. Throughout these years, it held a considerable market share and rack up respectable sales figures of over 7 million units sold.

How the code p0441 is diagnosed: Without a scan-tool: The first part is to check visually for obvious problems: if the gas cap closed properly, there is no cracks or other damage on the charcoal canister and all vacuum hoses related to the EVAP system are properly connected. If no obvious problem is found, the purge valve needs to be tested next. The purge valve is normally closed.
