Industry moves towards 16:10 from 2003 to 2008. Until about 2003, most computer monitors had a 4:3 aspect ratio and some had 5:4. Between 2003 and 2006, monitors with 16:10 aspect ratios became commonly available, first in laptops and later also in standalone monitors. Such displays

were considered to be better suited for productive uses such as word processing and computer-aided design.
