Show Step-by-step Solutions Try the free Mathway calculator and problem solver below to practice various math topics. Try the given examples, or type in your own problem and check your answer with the step-by-step explanations.

Algebra Simplifying Equations (solutions, examples, videos)

To answer this question, let's return to our simple example of the box and the stone on a balanced seesaw. If we triple the number of weights on each side (we are multiplying each side by 3), the seesaw should still balance. The "weight value" of each side remains equal. In words we can state this principle thus.

Often, algebra teachers use a graphing approach for solving these problems. When you're working with a system of two equations, the solutions are the points on a graph that the lines for both equations cross at. For example, let's say we're working with a system that contains the equations $y = 3x - 2$ and $y = -x - 6$.

How to Learn Algebra (with Pictures) - wikiHow

Create free worksheets for evaluating expressions with variables (pre-algebra / algebra 1) or grades 6-9. Control the number of operations in the problems, workspace, the number of problems, border around the problems, and additional instructions.

Free worksheets for evaluating expressions with variables ...

Welcome to the Algebra worksheets page at Math-Drills.com, where unknowns are common and variables are the norm. On this page, you will find Algebra worksheets mostly for middle school students on algebra topics such as algebraic expressions, equations and graphing functions.. This page starts off with some missing numbers worksheets for younger students.

Algebra Worksheets

The worksheets suit pre-algebra and algebra 1 courses (grades 6-9). You can choose from SEVEN
