The Late 4L60-E transmission has a three piece case of cast aluminum alloy; bellhousing, main case, and tailhousing. GM shortened the package to 21.9" long - equivalent to a manual transmission of 15.4". The input shaft has 30 splines. The transmission typically has pinned flare & o-ring fittings on the passenger side for a cooling circuit.

Novak Conversions :: 4L60E

The next 2 or 3 letters identify the model of the transmission. These numbers tell us the application, engine size, wiring type, and solenoids. If you find 2 letters, the transmission is made between 1982-1985.. If you find 3 letters, the transmission is made between 1986-1993.. The last way to identify if it's a 4L60 or a 700r4 is to look at the rear of the transmission for the Aux TV Cable ...

The two I will show you have the Tuff Torq K58. That transmission can handle hills and uneven ground well. The transmission in all the other Cub Cadets is a K46. It is a good transmission but has a reputation of not holding up on hills. It is strong enough for your normal suburban lawn but not strong enough for hilly properties.
